

## **Information of installing a Bus Shelter within the village**

Both the District and County Councillors were contacted in reference to the Parish Council installing bus shelters within the parish.

The information received is as below: -

The following people would need to be contacted for permission

- Somerset County Council – as permits and licences would need to be obtained.
- Bus Company – they know where to stop, if it is on an existing route, they are more likely to agree.
- Landowners' permission
- Planning permission is required if you're altering the highway in anyway though with this it may not be significant enough – have heard of several Parishes that have had to obtain planning permission.
